

VITAMIN A COMPARISON CHART

iS CLINICAL

Vitamin A Derivatives

Vitamin A is an essential nutrient required for healthy skin and human life. It functions as a potent antioxidant, anti-inflammatory, and skin normalizing vitamin. Vitamin A has many derivatives which are collectively known as Retinoids.

The two forms of Vitamin A that iS Clinical utilizes include botanically based Retinyl Palmitate and Retinol. Chemically speaking, Retinyl Palmitate is the gentle ester form of Vitamin A that is stored naturally in the skin making it incredibly tolerable and efficacious.

Retinol is an alcohol form of Vitamin A which is slightly more potent and faster acting than Retinyl Palmitate. iS Clinical formulates with non-keratolytic and keratolytic forms of Retinol to improve the skin health of a variety of skin types and conditions.

Cleanse

VITAMIN A: RETINYL PALMITATE

CLEANSING COMPLEX

CLEANSING COMPLEX POLISH

	AM & PM	AM OR PM
<i>Skin Types</i>	All skin types, pre- and post-procedure	All skin types
<i>Skin Conditions</i>	Aging repair and prevention Blemish-prone skin	Aging repair and prevention Blemish-prone skin Rough texture
<i>Benefits</i>	Multi-tasking daily cleanser Deeply cleanses and hydrates Removes makeup, including eye makeup Gentle exfoliation	Deeply cleanses and hydrates Excellent as a body polish Chemical and physical exfoliation
<i>Key Ingredients</i>	Willow Bark Extract (Source of Salicylic Acid), Sugarcane Extract (Source of Glycolic Acid), Chamomile Flower Extract, Centella Asiatica, Retinyl Palmitate (Vitamin A), Tocopheryl Acetate (Vitamin E), Ascorbyl Palmitate (Vitamin C)	Microcrystalline Cellulose, Jojoba Esters, Willow Bark Extract (Source of Salicylic Acid), Sugarcane Extract (Source of Glycolic Acid), Chamomile Flower Extract, Centella Asiatica, Retinyl Palmitate (Vitamin A), Tocopheryl Acetate (Vitamin E), Ascorbyl Palmitate (Vitamin C)
